No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1993 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 150

NUMBER 1, AUGUST 1993

NAI-KI MAK, MING-CHIU FUNG, KWOK-NAM LEUNG, AND ANDREW J. HAPEL. Monocytic Differentiation of a Myelomonocytic Leukemic Cell (WEHI 3B JCS) Is Induced by Tumour Necrosis Factor-Alpha (TNF- α)	1
Y. DELNESTE, P. LASSALLE, P. JEANNIN, L. MANNESSIER, J.-P. DESSAINT, M. JOSEPH, AND A.-B. TONNEL. Production of Anti-endothelial Cell Antibodies by Coculture of EBV-Infected Human B Cells with Endothelial Cells	15
PAOLO MOSCI, ANNA VECCHIARELLI, ELIO CENCI, MANUELA PULITI, AND FRANCESCO BISTONI. Low-Dose Streptozotocin-Induced Diabetes in Mice. I. Course of <i>Candida albicans</i> Infection	27
ANTONELLA MENCACCI, LUIGINA ROMANI, PAOLO MOSCI, ELIO CENCI, LAURA TONNETTI, ANNA VECCHIARELLI, AND FRANCESCO BISTONI. Low-Dose Streptozotocin-Induced Diabetes in Mice. II. Susceptibility to <i>Candida albicans</i> Infection Correlates with the Induction of a Biased Th2-like Antifungal Response	36
FLOYD E. FOX, HENRY C. FORD, RAY DOUGLAS, SAJEEV CHERIAN, AND PETER C. NOWELL. Evidence That TGF- β Can Inhibit Human T-Lymphocyte Proliferation through Paracrine and Autocrine Mechanisms	45
BERNADETTE LUCAS, ANNE ENGEL, DANIEL CAMUS, AND AZIZUL HAQUE. <i>Plasmodium yoelii</i> in Mice: Antigen Reactivity of CD4- and CD8-Bearing T Cells	59
PILAR ECHANIZ, JULIO ARRIZABALAGA, JOSE ANTONIO IRIBARREN, AND EMILIO CUADRADO. CD8 ⁺ CD38 ⁺ and CD8 ⁺ DR ⁺ Peripheral Blood Lymphoid Subsets of HIV-Infected Intravenous Drug Abusers Correlate with CD4 ⁺ Cell Counts and Proliferation to Mitogens	72
AKIRA IMAIZUMI, IRVING GOLDSCHNEIDER, AND TAKESHI YOSHIDA. Reproducible Procedures for Establishing Mouse Thymic Stromal Cell Lines	81
DAVID A. SCHWARZ, JANET E. BUHLMANN, MICHELLE R. KUHNE, TAN M. LAM, HILLARY D. WHITE, AND WILLIAM R. GREEN. Novel Regulation of an MHC Class I Gene Response to Interferon- γ	90
MARY HAAK-FRENDSCHO, KOHSUKE KINO, TOSHIO SONE, AND PAULA JARDIEU. Ling Zhi-8: A Novel T Cell Mitogen Induces Cytokine Production and Upregulation of ICAM-1 Expression	101
DERIC D. SCHOOF, YASUNORI TERASHIMA, GEORGE E. PEOPLES, PETER S. GOEDEGEBUURE, J. VALERIE RAVAN ANDREWS, JEROME P. RICHIE, AND TIMOTHY J. EBERLEIN. CD4 ⁺ T Cell Clones Isolated from Human Renal Cell Carcinoma Possess the Functional Characteristics of Th2 Helper Cells	114
MICHIYUKI KASAI, TAKUJI SHIRASAWA, MASANORI KITAMURA, KAZUMI ISHIDO, EIKI KOMINAMI, AND KATSUOKU HIROKAWA. Proenzyme Form of Cathepsin L Produced by Thymic Epithelial Cells Promotes Proliferation of Immature Thymocytes in the Presence of IL-1, IL-7, and Anti-CD3 Antibody	124
SEFIK S. ALKAN, SUSAN RUTSCHMANN, DANIEL GROGG, AND PETER ERB. Effects of a New Protein Kinase C Inhibitor CGP 41251 on T Cell Functions: Inhibition of Activation, Growth, and Target Cell Killing	137
H. ZOLA, L. FLEGO, AND H. WEEDON. Expression of IL-4 Receptor on Human T and B Lymphocytes	149
SHUNSEI HIROHATA. Inhibition of B Cell Expression of DNA Polymerase α by CD4 ⁺ Suppressor T Cells	159
SOJI BITOH, MASARU TAKATA, PRADIP K. MAITI, VALERIE HOLFORD-STREVEIS, DANUTA KIEREK-JASZCZUK, AND ALEC H. SEHON. Antigen-Specific Suppressor Factors of Noncytotoxic CD8 ⁺ Suppressor T Cells Downregulate Antibody Responses Also to Unrelated Antigens When the Latter Are Presented as Covalently Linked Adducts with the Specific Antigen	168
S. FOURNEL, P. MOREL, J. P. REVILLARD, G. LIZARD, AND N. BONNEFOY-BERARD. Inhibition of Human T Cell Response to Staphylococcal Enterotoxin B by Prior Ligation of Surface CD4 Molecules	194
LUIS FILGUEIRA, MARKUS ZUBER, ANTONIO JURETIC, URS LÜSCHER, VERENA CAETANO, FELIX HARDER, GIANNI GAROTTA, MICHAEL HEBERER, AND GIULIO C. SPAGNOLI. Differential Effects of Interleukin-2 and CD3 Triggering on Cytokine Gene Transcription and Secretion in Cultured Tumor Infiltrating Lymphocytes	205

HASSAN FAHMI AND RICHARD CHABY. Desensitization of Macrophages to Endotoxin Effects Is Not Correlated with a Down-Regulation of Lipopolysaccharide-Binding Sites	219
PAPERS TO APPEAR IN FORTHCOMING ISSUES	230

NUMBER 2, SEPTEMBER 1993

KAREN F. KOZARSKY, CARLENE TSAI, CYNTHIA M. BOTT, GOPAL ALLADA, LAN LAN LI, AND DAVID A. FOX. An Anti-CD2 Monoclonal Antibody That Both Inhibits and Stimulates T Cell Activation Recognizes a Subregion of CD2 Distinct from Known Ligand-Binding Sites	235
ARILD FAXVAAG, TERJE ESPEVIK, AND ARE DALEN. Multiple Derangements of Cytokine Homeostasis in Mice Infected with Immunosuppressive Retrovirus	247
SHUNSEI HIROHATA AND SATOSHI SHINOHARA. Bidirectional Modulation of Human B Cell Stimulation by Activated T Cells	257
YONG-MEI DOU, WILFRED T. V. GERMERAAD, JUN-ICHIRO GYOTOKU, AND YOSHIMOTO KATSURA. Frequency Analysis of the T Cell Precursors in the Thymus	269
COLLEEN S. STEIN AND GILL H. STREJAN. Rat Splenocytes Inhibit Antigen-Specific Lymphocyte Proliferation through a Reactive Nitrogen Intermediate (RNI)-Dependent Mechanism and Exhibit Increased RNI Production in Response to IFN- γ	281
SHAHIK K. GREGORIAN, LISE CLARK, ELLEN HEBER-KATZ, EDWARD P. AMENTO, AND ABDOL-MOHAMAD ROSTAMI. Induction of Peripheral Tolerance with Peptide-Specific Anergy in Experimental Autoimmune Neuritis	298
SAMMY H. LIU, DE-HU ZHOU, AND ALLAN D. HESS. Adoptive Transfer of Experimental Autoimmune Dacryoadenitis in Susceptible and Resistant Mice	311
ALEXANDRA DIMITRIU-BONA AND HOWARD FILLIT. Studies of the Cellular Immune Response to Heparan Sulfate Proteoglycan in the Tight Skin Mouse	321
NOBUAKI HIGASHI, HIROTO TAKI, YOSHIKO NISHIMURA, MASAHIRO HIGUCHI, AND TOSHIAKI OSAWA. Chromium and Tritiated Thymidine Releases from Target Cells Are Differential Events in Human Monocyte/Macrophage-Mediated Cytotoxicity	333
MONG-SHANG LIN AND YUNG-WU CHEN. B Cell Differentiation. II. Isotype Potential of a Single B Cell	343
HARUHIKO TOKUYAMA AND YUKIKO TOKUYAMA. Retinoids Enhance IgA Production by Lipopolysaccharide-Stimulated Murine Spleen Cells	353
SUSAN M. MCCABE, LAVON RIDDLE, GERALD R. NAKAMURA, HARDAYAL PRASHAD, ANITA MEHTA, PHILLIP W. BERMAN, AND PAULA JARDIEU. sICAM-1 Enhances Cytokine Production Stimulated by Alloantigen	364
LAKSHMI KRISHNAN, RADSLAV KINSKY, GERARD CHAOUAT, G. P. TALWAR, AND RAJ RAGHUPATHY. Suppression of Local and Systemic GVHR by Supernatants from Human Choriocarcinoma Cell Lines	376
FRANCA GEROSA, MARINA TOMMASI, CLAUDIA BENATI, GIORGIO GANDINI, MASSIMO LIBONATI, GIUSEPPE TRIDENTE, GIUSEPPE CARRA, AND GIORGIO TRINCHIERI. Differential Effects of Tyrosine Kinase Inhibition in CD69 Antigen Expression and Lytic Activity Induced by rIL-2, rIL-12, and rIFN- α in Human NK Cells	382
J. P. MCGILLIS, S. HUMPHREYS, V. RANGNEKAR, AND J. CIALLELLA. Modulation of B Lymphocyte Differentiation by Calcitonin Gene-Related Peptide (CGRP). I. Characterization of High-Affinity CGRP Receptors on Murine 70Z/3 Cells	391
J. P. MCGILLIS, S. HUMPHREYS, V. RANGNEKAR, AND J. CIALLELLA. Modulation of B Lymphocyte Differentiation by Calcitonin Gene-Related Peptide (CGRP). II. Inhibition of LPS-Induced κ Light Chain Expression by CGRP	405
GIAMILA FANTUZZI, LAVINIA CANTONI, MARINA SIRONI, AND PIETRO GHEZZI. Inhibitors of Cytochrome P450 Suppress Tumor Necrosis Factor Production	417
JOHN M. LUBINSKI, S. JILL JAMES, LAWRENCE T. NAKAMURA, ALEXIA SERRANO-WILLIAMS, MARK T. MUNEKATA, SIEW C. HO, JEFFREY C. CHUNG, AND TAKASHI MAKINODAN. Double-Negative (L3T4 $^{-}$, Lyl2 $^{-}$) Thymocytes of Autoimmune <i>lpr/lpr</i> Mice Are Resistant to Down-Regulation of DNA Synthesis by a Thymic Stromal Cell Product	425

SHORT COMMUNICATIONS

PASCALE HAUSS, FABIENNE MAZEROLLES, CLAIRE HIVROZ, OLIVIA LECOMTE, CHRISTIANE BARBAT, AND ALAIN FISCHER. GF109203X, a Specific PKC Inhibitor, Abrogates Anti-CD3 Antibody-Induced Upregulation of CD4 ⁺ T Cell Adhesion to B Cells	439
KIRSTEN FALK, OLAF RÖTZSCHKE, STEFAN FAATH, SAMUEL GOTH, ISABELLA GRAEF, NILABH SHASTRI, AND HANS-GEORG RAMMENSEE. Both Human and Mouse Cells Expressing H-2K ^b and Ovalbumin Process the Same Peptide, SIINFEKL	447
BALAJI BALASA AND GEORGE CARAYANNIOTIS. Immunotargeting of Thyroglobulin on Antigen Presenting Cells Abrogates Natural Tolerance in the Absence of Adjuvant	453

ERRATUM

Volume 149, Number 1, 1993: Nozomi Koyamada, Toshiaki Ohteki, Toru Abo, Tatsuya Fukumori, Nobuhiro Ohkouchi, Susumu Satomi, Yoshio Taguchi, Akinori Kusumi, Shozo Mori, and Katsuo Kumagai, "Induction of Specific Tolerance by Hepatic Double-Negative CD4 ⁻ 8 ⁻ αβ T Cells of Mice Immunized with Allogeneic Cells via the Portal Vein <i>in Vitro</i> ," pp. 107-116	459

AUTHOR INDEX FOR VOLUME 150	466

NOTICE

The Subject Index for Volume 150 will appear in the December 1993 issue as part of a cumulative index for the year 1993.

Digitized by the Internet Archive
in 2023 with funding from
Kahle/Austin Foundation

Cellular Immunology will provide an international medium devoted exclusively to publication of original investigations concerned with the immunological activities of cells in experimental or clinical situations. The scope of the journal will encompass the broad area of *in vitro* and *in vivo* studies of cellular immune responses. These include, for example, delayed type hypersensitivity or cellular immunity; immunologic surveillance and tumor immunity; transplantation immunology; autoimmunity, resistance to intracellular microbial and viral infection; immunologic deficiency states and their reconstitution; antigen receptor sites; thymus and lymphocyte immunobiology, etc. The chief criteria for acceptance of papers submitted for publication are the originality, clarity, and quality of the work reported. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cellular Immunology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All manuscripts should be submitted to the Editor: Dr. H. Sherwood Lawrence, Infectious Disease and Immunology Division, Department of Medicine, New York University Medical Center, 550 First Avenue, New York, New York 10016.

Form. Manuscripts should be typewritten and double-spaced throughout (including tables, footnotes, references, and figure captions); the original typescript should be prepared on one side of a good grade of $8\frac{1}{2} \times 11$ -inch white paper, with 1-inch margins on all sides. Mimeographed or duplicated manuscripts will be accepted if they are indistinguishable from good typed copies. Submit three complete copies in order to expedite processing of the manuscript. Each copy must include all figures and tables.

Number the pages consecutively. Page 1 should contain the article title, author(s), and affiliation(s); at the bottom of the page type a short running head title not exceeding 45 characters (including spaces), and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. Page 2 should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and sub-headings.

Abbreviations. Do not use final periods after abbreviations of measure (cm, sec, kg, etc.) in text or in tables, except for "in." (inch). Use the American Chemical Society *Style Guide*, 1986, as a reference.

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number equations consecutively, with the number placed in brackets to the extreme right of the equation. Refer to equations as Eq. [3] or simply [3], except at the beginning of a sentence, when the word Equation should be spelled out. Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use superscript Arabic numbers ^{1,2}, etc. in the text citations and in the list.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered ^{a,b}, etc. at the end of the table.

Figures. Number figures consecutively in the text with Arabic numerals. Type legends double-spaced together on a separate sheet. Original illustrations no larger than $8\frac{1}{2} \times 11$ inches are preferred. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5×8 in.). Lettering on drawings should be of professional quality or generated by high-resolution computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth surface white paper, or Bristol board. Alternatively, high-quality computer graphics may be acceptable. Graphs should be plotted with black India ink on light blue or white coordinate paper with coordinates properly labeled; grid lines that are to show should be inked in black. Photographs should be submitted as glossy prints (5×7 or 8×10 inches) and not marred by staples, paper clips, or pencil marks. Groupings of photographs should be indicated; if mounting is necessary, use 10- to 12-point flexible board.

Illustrations in color can be accepted only if the authors defray the cost.

References. These should be cited in the text by a number in parentheses and listed at the end of the paper in numerical order. Note the following style for book and journal citations:

1. Leopardi, E., and Rosenau, W., *Cell. Immunol.* **83**, 73, 1984.
2. Buckley, R. H., In "Monoclonal Antibodies: Probes for the Study of Autoimmunity and Immuno-deficiency" (B. F. Haynes and G. S. Eisenbarth, Eds.), pp. 83–95. Academic Press, Orlando, FL, 1983.
3. Katz, D. H., "Lymphocyte Differentiation, Recognition, and Regulation." Academic Press, New York, 1977.

Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index*, 1985. Unpublished observations and personal communications should be cited in the text as such, and should not be included in the reference list.

Letters to the Editor relating to articles appearing in *Cellular Immunology* are welcome and will be published, if found suitable, as limited space permits. All letters must be typewritten in the format of other material submitted for publication and limited in length to two typewritten pages.

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proof.

Personal computer disks. Manuscripts may be submitted to *Cellular Immunology* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 1250 Sixth Avenue, San Diego, California 92101; telephone: (619) 699-6415; fax: (619) 699-6800).
